

HUDSON VALLEY COMMUNITY COLLEGE

Charging Destination Information:

Location: Troy, NY

Industry: Education

Charging Access: Public

Use Cases:

- Faculty and staff amenity
- Community charging opportunity for students/visitors
- Training & workforce development

Infrastructure Hardware:

- Twelve (12) 6.656 kW Level 2 Charging Ports

Overview & Goals:

Hudson Valley Community College has recognized the need to educate a new generation of technicians and electricians with the knowledge and skills to meet the demands of a rapidly changing workforce landscape.

Ensuring EV charging was available across the campus was a natural integration with their Vehicle to Grid Educational Initiative.

Rebates & Incentives:

- National Grid Make Ready **\$139,145**

Driver Software Network:

Hudson Valley Community College is proud to partner with Lynkwell on several clean and renewable energy projects, including providing electric vehicle charging infrastructure on our campus. We have expanded our automotive programs to include electric vehicle technician training, and this infrastructure offers hands-on learning opportunities in addition to allowing our students, employees and visitors to charge their vehicles

Kate Better
Chief Operating Officer
