

Unity Bank

Charging Destination Information:

Location: Clinton, NJ

Industry: Retail

Charging Access: Public

Use Cases:

- Customer amenity
- Workplace charging

Infrastructure Hardware:

- Four (4) 60 kW DC Fast Charging Ports

Overview & Goals:

Unity Bank has introduced EV charging stations at its Clinton, NJ, headquarters, reinforcing its commitment to sustainability.

The fast-charging DCFC stations provide charging times comparable to the duration of customer transactions and offer discounts for employees and customers.

By integrating renewable energy, the bank aims to encourage EV adoption while enhancing convenience for customers and the community.

Driver Software Network:

ViaLynk
by  Lynkwell

This is an investment not only for Unity Bank as a company but also for our employees, customers, and community members. We hope that by offering access to EV charging, more individuals will consider switching to electric vehicles and contribute to a more sustainable future.

James Hughes
President & CEO, Unity Bank
