

Town of Westport

Charging Destination Information:

Location: Westport, NY

Industry: Municipal

Charging Access: Public

Use Cases:

- Community charging opportunity
- Tourist and visitor parking

Infrastructure Hardware:

- Two (2) 75 kW DC Fast Charging Ports

Overview & Goals:

Westport has invested in EV infrastructure as part of its broader shift toward green energy, using grant funding to purchase an electric vehicle and install charging infrastructure.

The town powers their EV fleet vehicles with solar panels on its town hall and wastewater plant, saving on fuel and reducing emissions. The town has installed a DC Fast Charger at Ballard Park—a year-round community entertainment venue that offers a public beach, summer concert series, and skating rink.

Including EV charging enhances accessibility to this historic and vibrant public space in the Adirondacks, supporting tourism, sustainability, community engagement, and future-ready infrastructure.

Driver Software Network:

"I've witnessed big changes in the climate over my lifetime. Lake Champlain rarely freezes over anymore, winters are generally warmer, and heavy rain storms have done significant damage to the town's infrastructure. So moving towards using green energy makes sense. I'm a firm believer in doing our part"

Ike Tyler

Town Supervisor

Westport, NY and Ballard Park are ideal for EV drivers thanks to convenient fast charging, scenic lakefront amenities, and easy access to year-round recreation in the heart of the Adirondacks.
