Industry: Hospitality

Charging Access: Public

Use Cases:

- Tourist and visitor parking
- Guest amenity
- Workplace charging

Infrastructure Hardware:

- Twelve (12) 9.984 kW Level 2 Charging Ports

Overview & Goals:

The Seminole Tribe of Florida is actively integrating electric vehicle (EV) charging infrastructure as part of its broader sustainability strategy.

By expanding charging access across its reservations and destinations such as Seminole Brighton Bay Hotel & Casino, the tribe supports the transition to cleaner transportation, helps decarbonize its vehicle fleet, and improves local air quality.

EV charging also enhances amenities for visitors, positioning tribal enterprises as forward-thinking destinations that align environmental stewardship with economic development and guest convenience.

Driver Software Network:

ViaLynk
by Lynkwell

Tribal communities are embracing electric vehicle technology as part of a broader push for energy sovereignty. EV infrastructure not only supports sustainability and cleaner air but also creates new economic opportunities on tribal lands, helping tribes lead in innovation while enhancing services and experiences for residents and visitors alike.
